

Rain Trees Kindergarten Moved Their Classrooms Outdoor

Li Hui Ling Li Jing Song

Learning is not limited only to the classroom; through simple and fun outdoor games, kids can also acquire the knowledge they could learn in the classroom.

Rain Trees Kindergarten is a kindergarten which advocates outdoor learning. The head of the kindergarten Katie said, kids should not be kept in the classroom the entire day and forced to absorb some boring contents.

Kids at this age are at their stage of fastest learning and they're also at their best when it comes to absorbing knowledge.

Therefore, Katie took advantage of the golden learning period of kids. Interesting games are integrated into the courses, allowing kids to learn while having fun.

Katie said, usually after buying a piece of technology (such as an iPhone), we normally don't read the instructions seriously (if at all). We explore it ourselves, this also allow us to better understand the functionality of the product.

Similarly kids like to play games, the best way to learn is to integrate knowledge into the games, letting them explore and unearth.
